

# Construction of a regional solid waste landfill with an area of 60 hectares in the territory of the Korosten district (crossroads of routes M-07 and R-49)

Korosten City Community  
Zhytomyr region, Ukraine, 2023

# Construction of a regional solid waste landfill with an area of 60 hectares in the territory of the Korosten district (crossroads of routes M-07 and R-49)

ESSENCE

## A brief description of the idea

- The construction and operation of a household waste landfill involves equipping it with groundwater protection systems, extracting and neutralizing biogas and leachate, which minimizes its impact on the environment.

## GOAL

- Improving the sanitary-epidemiological and ecological condition of the territories of communities of the Korosten district by ensuring the organization of separate collection of solid waste; sorting, processing and disposal of solid waste; liquidation of natural and disorderly landfills.

## FACTORS OF INVESTMENT ATTRACTIVENESS

### Construction of a regional solid waste landfill with an area of 60 hectares in the territory of the Korosten district (crossroads of routes M-07 and R-49)

- The project envisages a sorting station for the extraction of secondary raw materials.
- Thus, the landfill is focused not only on minimizing its impact on the environment, but also on obtaining economic benefits through the use of the generated biogas and the use (or sale) of sorted secondary raw materials.
- The construction of the landfill will solve the issue of waste management of the surrounding communities

- The organization of the enterprise is expected to jointly solve the issue of household waste management in the territory of communities of the Korosten district, in particular: the construction of a new solid waste landfill, which will meet all construction and environmental standards; organization of separate collection of solid waste, liquidation of spontaneous and disorderly landfills for removal to a solid waste landfill and further sorting, processing and disposal.

# Construction of housing for internally displaced persons who suffered as a result of military aggression

**Korosten city community,  
Zhytomyr region, Ukraine, 2023**

# Construction of housing for internally displaced persons who suffered as a result of military aggression

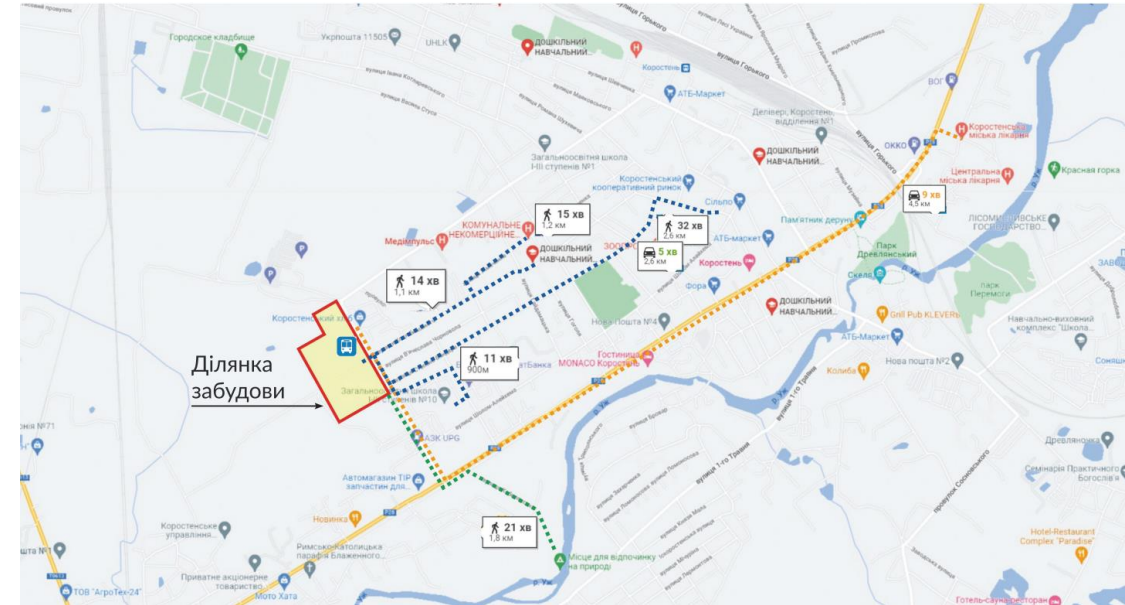

## ESSENCE

### A brief description of the idea

The prerequisite for the development of the project was the relocation of more than 3,000 people to the territory of the Korosten community who need a place to live.

A plot of land has been allocated, negotiations are underway with house manufacturers.

# Construction of housing for internally displaced persons who suffered as a result of military aggression

## FACTORS

### GOAL

Solving the problem of accommodation and providing housing in order to stay for permanent residence in the territory of the community of internally displaced persons (3 thousand people)

### "Reconstruction of the communal non-profit enterprise "Korosten Central City Hospital of the Korosten City Council" with the construction of the Surgical Building at 8 Amosova Mykola Street in the city of Korosten, Zhytomyr Region (2nd phase - 2nd launch complex - ward and rehabilitation department)"

- Through the implementation of the project, residents of the northern region of Zhytomyr region will receive qualified medical and rehabilitation assistance.
- The financial resource of the region will increase due to the income from the payment of personal income tax of the Korosten Central City Hospital and from the newly concluded contracts on medical care of the population by the National Health Service of Ukraine.
- Creation of new jobs. Reconstruction of the building will be carried out in accordance with the current legislation of Ukraine with the help of energy-saving measures.

# Reconstruction of the centralized water supply and drainage systems of the Vodokanal utility company in the city of Korosten, Zhytomyr Region

For domestic and consumer needs, water is taken from the Uzh River, which is the one source of drinking water in Korosten.

Korosten community needs help in the reconstruction of centralized water supply and drainage systems.

The condition of water supply and sewage networks, a large part of which has been in operation since the 60s of the last century, is deteriorating every year, and this makes the problem critical.

# Reconstruction of the centralized water supply and drainage systems of the Vodokanal utility company in the city of Korosten, Zhytomyr Region

GOAL

- Improving the quality of service provision by the communal enterprise "Vodokanal" by means of reconstruction of centralized water supply and drainage systems.

# Reconstruction of the centralized water supply and drainage systems of the Vodokanal utility company in the city of Korosten, Zhytomyr Region

## EXPECTED RESULTS

- The quality of centralized water supply and drainage services has been improved;
- Reduced production costs for providing services by implementing energy-efficient measures;
- All quality indicators of water condition (chemical and bacteriological) are ensured in accordance with the requirements;
- The level of satisfaction of community residents in receiving quality services has increased;
- The volumes have been reduced and the conditions for pollution of the coastal areas of the rivers have been eliminated.
- Modern requirements for the proper quality of sewage treatment and the provision of centralized water drainage services have been met;
- Adequate quality of sewage treatment improves the quality of annual water for water consumers located downstream (Kyiv city).
